# Visitor Management

Visitor Management Solutions (VMS) refers to the process by which visitor access to a company's facility is expedited and managed. Visitor identification by means of scanning their ID cards and if applicable their vehicle details, ensures that sites have the most accurate data available to them to assist in mitigating security concerns.
Above that all our PT-Guest and PT-Scan solutions are POPI compliant.

Why invest in VMS?

➢ Streamline visitor access to site
➢ Automate visitor information capture
➢ Accurate details of visitor and their respective vehicle
➢ Improved site access statistical information
➢ Enhanced security across all user access
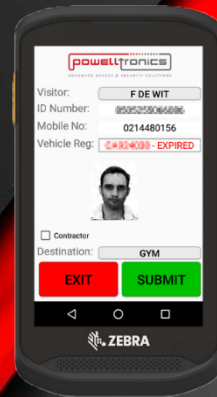

Solutions We Offer

	Integrated to Access Control	Integrated Barcode Scanners	Integrated OTP Printing	Scanning of Driver License	Scanning of Vehicle License	Offline Capabilities	Pre-Authorisation of Visitors	Visitor Destination Allocation	Passenger Detail	Contractor Management	Delivery Services Management	Mobile Apps	Detailed Reporting Suite	Visitor Movement Notifications	Blacklist of Visitors
